BRIEF NOTE ABOUT OUR CONCEPT, THE LOCATION WE CHOSE, WHAT WE EXPERIENCED

The creative approach behind the project was inspired by cinematic urban storytelling and modern social media aesthetics.

The visuals focus on creating an immersive atmosphere through carefully framed shots, smooth camera movements, warm color grading, and aesthetic compositions. While creating this video, we realized how deeply design and aesthetics exist within everyday surroundings.

Our video looks at the parts of commercial design and the rules that govern them but we do this in a way that is similar to Wes Andersons style. We compare the buildings in South Mumbai to the bright street art in Bandra.

We filmed this video in places like Churchgate, Kitab Khana and Bandra including Chapel Road and a small café. The video follows the things that we need to learn about design. We use the shapes and old buildings in Churchgate to show how lines and spaces work together and how we can use them to create a sense of depth. We also look at the art displays and walls to show different textures and shades and the murals in Bandra show us how color and shapes can be used in a fun way.

To make sure we cover all the design rules our video changes from colors to black and white which shows us how important it is to have contrast and make some things stand out. By keeping the color style moving at a steady pace and framing our shots carefully our video looks balanced and whole which is what we want.

hello

Thank you!
