Ad Formats: Why Modern Wins

Reels vs. Billboards: Active Scrolling

Our youth audience doesn't look up at roadside billboards; they look down at their feeds. Reels intercept students with dynamic, relatable storytelling right in their pocket.

Memes vs. Print: Viral Loop Potential

Print ads are static and isolated. Memes speak the fluid, humorous native language of Gen-Z, turning Parle-G into a shareable cultural currency across DMs and group chats.

Screen-Time Stamina Synergy

Aligning with our communication goals, native mobile ad formats keep Parle-G culturally top-of-mind during key digital creator & coding grinds.

Conclusion

- **The Challenge**: Despite its iconic legacy as a nostalgic household staple , Parle-G faces a perception gap among Gen Z consumers, who view it as an "old-school" brand that lacks an edgy identity.

- **The Core Shift**: We are bridging this gap by repositioning Parle-G from a passive tea-time biscuit to high-octane "Creator Fuel".

- **The Future Vision**: By leveraging meme-first marketing, a digital squad culture, and highlighting "screen-time stamina" , we will successfully blend Parle-G's retro-cool heritage with unstoppable digital momentum. This transforms a childhood favorite into a cool, affordable, late-night snack for young adults.
